Include CA certificate of SMT server on SUSE 15 GCP

```
/usr/sbin/registercloudguest --force-new
[SSL: CERTIFICATE_VERIFY_FAILED]
server:~ # certtool -i < /var/lib/ca-certificates/ca-bundle.pem | grep suse-
public-cloud@susecloud.net
    Issuer: EMAIL=suse-public-
cloud@susecloud.net,CN=SUSE,OU=CSM,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
    Subject: EMAIL=suse-public-
cloud@susecloud.net,CN=SUSE,OU=CSM,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
        RFC822Name: suse-public-cloud@susecloud.net
        RFC822Name: suse-public-cloud@susecloud.net

server:~ #
server:~ # ls /etc/ssl/certs/*SUSE*
/etc/ssl/certs/SUSE.pem
server:~ #
wget http://smt-gce.susecloud.net/smt.crt
cp smt.crt /etc/pki/trust/anchors/smt.crt
update-ca-certificates
server:~ # certtool -i < /var/lib/ca-certificates/ca-bundle.pem | grep suse-
public-cloud@susecloud.net
    Issuer: EMAIL=suse-public-cloud@susecloud.net,CN=SUSE,OU=Public
Cloud,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
    Subject: EMAIL=suse-public-cloud@susecloud.net,CN=SUSE,OU=Public
Cloud,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
    Issuer: EMAIL=suse-public-
cloud@susecloud.net,CN=SUSE,OU=CSM,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
    Subject: EMAIL=suse-public-
cloud@susecloud.net,CN=SUSE,OU=CSM,O=SUSE,L=Nuremberg,ST=Bavaria,C=DE
        RFC822Name: suse-public-cloud@susecloud.net
        RFC822Name: suse-public-cloud@susecloud.net

server:~ # ls -l /etc/ssl/certs/*SUSE*
-r--r--r-- 1 root root 1891 Jan 17 11:19 /etc/ssl/certs/SUSE.1.pem
-r--r--r-- 1 root root 2167 Jan 17 11:19 /etc/ssl/certs/SUSE.pem
server:~ #
/usr/sbin/registercloudguest --force-new
server:~ # SUSEConnect --status-text
Installed Products:
-----

SUSE Linux Enterprise Server for SAP Applications 15 SP2
(SLES_SAP/15.2/x86_64)

Registered

-----
(blablalba)
```

Note

Is temporary fix... that will help you to get out of the problem... but I don't know what will happen when the certificate expires, maybe you will need to remove the crt from the path after you get a correct resolution.
