## RHEL 6 limits.conf notes

You must edit two files:

`/etc/security/limits.conf`

The case of `nprocs` is particular in RHEL:

`/etc/security/limits.d/90-nproc.conf`

You can add more limits configuration files in the directory:

`/etc/security/limits.d`

Examples:

```
root      soft    nofile   8192
root      hard    nofile   8192
netcool   soft    nofile   8192
netcool   hard    nofile   8192
```
