## Self Service FreeIPA or RedHat IDM

You will need install two additional packages, [RedHat](#) doesn't provides from DVD php-mbstring, you need to subscribe to optional packages or download the correct RPM from [RedHat](#) page.

Create /etc/httpd/conf.d:

```
Alias /user "/usr/local/self-service-password/"
DirectoryIndex index.php
AddDefaultCharset UTF-8

<Directory "/usr/local/self-service-password/">
    AllowOverride None
    <IfVersion >= 2.3>
        Require all granted
    </IfVersion>
    <IfVersion < 2.3>
        Order Deny,Allow
        Allow from all
    </IfVersion>
</Directory>

<Directory /usr/local/self-service-password/scripts>
    AllowOverride None
    <IfVersion >= 2.3>
        Require all denied
    </IfVersion>
    <IfVersion < 2.3>
        Order Deny,Allow
        Deny from all
    </IfVersion>
</Directory>

LogLevel warn
ErrorLog /var/log/httpd/ssp_error.log
CustomLog /var/log/httpd/ssp_access.log combined
```

```
cd /tmp
wget
https://github.com/ltb-project/self-service-password/archive/v1.3.tar.gz
tar -zxvf v1.3.tar.gz -C /usr/local/
ln -s /usr/local/self-service-password-1.3/ /usr/local/self-service-password
systemctl restart httpd
```

```
$ sudo yum install php-ldap php-mbstring
$ sudo yum localinstall self-service-password-1.3-1.el7.noarch.rpm
```
